Experience

MeridianLink   Costa Mesa, CA
Software Integration Engineer   *Oct 2017 - Present*
- Integrated SOAP API's into the LPQ loan origination service to facilitate backend loan booking
- Developed .NET microservices for account opening, loan origination, and customer querying
- Performed code review on commits from other developers
- Maintained version control through Git, BitBucket, SVN, and Tortoise
- Worked with clients and software deployment consultants to mitigate friction with new deployments
- Provided troubleshooting and debugging support for production software
- Tracked issues and tasks with FogBugz and Jira

Dats2 Corporation   Mountain View, CA
Software Development Intern   *Jun 2016 - Aug 2016*
- Developed product upload, login, and display services for the *Lookwiz* app
- Angular, MongoDb, TypeScript, Git

Projects

Patch Notes When
- Responsive, mobile-friendly web app built with React, Node, Express, and Bootstrap
- Hosts up to date announcements from the Path of Exile website
- Leverages a web crawler deployed on Google App Engine to extract the newest posts
- Stores posts in a NoSQL, MongoDB cluster for quick retrieval

Trie Hugger
- Interactive, animated web app which represents randomly generated text as a trie data structure
- Uses the D3 JavaScript library to visualize the data as a tree or pack layout
- Built with React and Bootstrap
